

# CONTAINERS FOR SEEDLINGS

**PLAST FORM**

## Plastopor containers for seedlings

The company Plastform in a wide range of products offers styrofoam containers for growing seedlings with different numbers of seeding spots.

The containers with 160, 170 and 209 holes are commonly used for seedlings of lettuce, cabbage and swiss chard. The containers with 104 holes are mostly used for cabbage, peppers, eggplant and flowers while the containers with 84, 60 and 40 holes are used for tomatoes, peppers, watermelons, melons, and also for eggplants and flowers.

With our exceptional experience in production, which is evidenced in the production of more than ten million containers for seedlings and the use of BVQI approved Quality System for supervision, compliant with ISO 9001:2000, we can guarantee the highest quality of our products and services.

## Plastopor containers for seedlings

**24 HOLES**

Dimensions: 537 x 328 x 65 mm

Dimensions of the opening: Ø 72 / 54 x 60 mm

Volume of the opening: 182 ml

Application: watermelon, suitable for transport

**PLASTFORM**

## Plastopor containers for seedlings

**40 HOLES**
